

Module-7

Continuous Quality Improvement

Board of Accreditation for Engineering and Technical Education (BAETE)

Training on OBE and Accreditation, 26 – 27 June, 2026

Nehreen Majed, PhD
Member, Training Task Force, BAETE
Professor, Department of Civil & Environmental Engineering, North South University

Outline of the Session

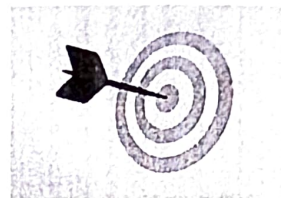

- Outcome of the session
- CQI – An Integral Component of OBE
- Components of CQI
- Inputs and Feedback from Stakeholders
- Assessment of Feedback from Stakeholders
- Analysis and Improvement Actions in CQI
- Records of Evidence
- Establish CQI Cycle
- Example and Exercise

Outcome of the Session

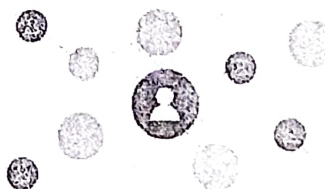

- Familiarity with CQI Process
- Informed knowledge on CQI components
- Better Preparation for CQI implementation
- Better understanding on the action items and planning requirements to close CQI loops
- Identification of the key stakeholders involved in the CQI process
- Identification of the supporting resources required to make CQI process effective to contribute to OBE implementation

CQI – An Integral Component of OBE

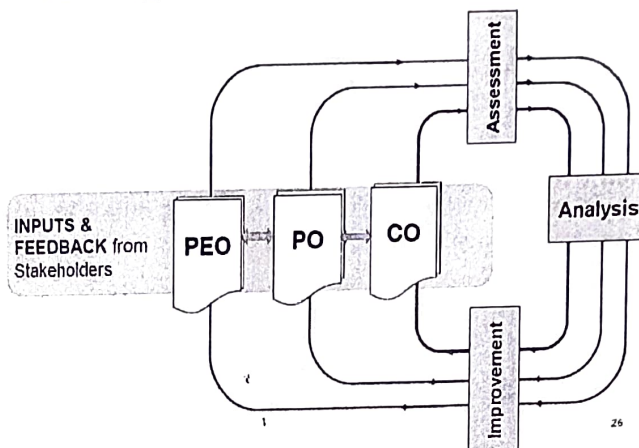

- Continuous Quality Improvement (CQI) is an ongoing process where achievements are evaluated based on data and stakeholders' feedback to initiate an action plan for improvement.
- Stakeholders
 - Students
 - Alumni
 - Faculty members
 - Employers
 - Industry Advisory Panel (IAP)
 - Professional org.

Components of CQI

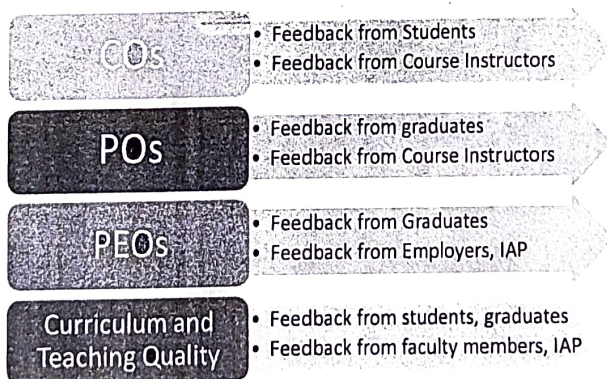

Three components of CQI:

- Feedback from Stakeholder to collect assessment data
- Analysis of assessment data
- Improvement/Action plan

Inputs and Feedback from Stakeholders

Program must complete the CQI loops periodically for

CQI loops should be a regular practice not done occasionally just before the accreditation visit

Assessment of Feedback from Stakeholders

Periodic feedback from key stakeholders on the attainment of CO, PO, PEO and other aspects of the program is important in the CQI process

☐ Student feedback:

- In every course students give feedback on the course including COs, and constructive alignment
- Meeting with Student Advisory Board / Student Council
- Exit interviews/surveys with graduating students
- Student evaluation survey, individual faculty-student interaction

Assessment of Feedback from Stakeholders

Periodic feedback from key stakeholders on the attainment of CO, PO, PEO and other aspects of the program is important in the CQI process

☐ Faculty feedback:

- Feedback on Course outcome using course embedded assessment, Constructive alignment etc.
- Departmental committee meetings
- Regular faculty meetings and interactions

Assessment of Feedback from Stakeholders

Periodic feedback from key stakeholders on the attainment of CO, PO, PEO and other aspects of the program is important in the CQI process

☐ Industry feedback:

- Industry Advisory Board (IAB) meeting
- Surveys with industry
- Employer satisfaction surveys

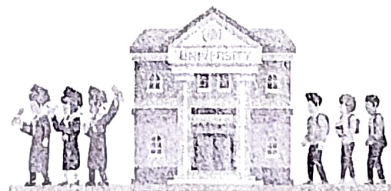

Assessment of Feedback from Stakeholders

Periodic feedback from key stakeholders on the attainment of CO, PO, PEO and other aspects of the program is important in the CQI process

☐ Alumni feedback:

- Alumni Advisory Board
- Surveys with Alumni

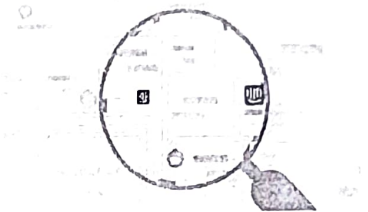

Analysis and Improvement Actions in CQI

☐ Analysis: Data need to be analyzed carefully to

- Evaluate achievements of PEO, PO, CO
- Identify strengths and weaknesses
- Identify opportunities and threats
- Gather the big picture, trends and patterns

☐ Improvement: Prepare an action plan based on data analysis

- To update objectives, outcomes, contents, delivery and assessment
- To update policies
- To update infrastructural and other facilities

11

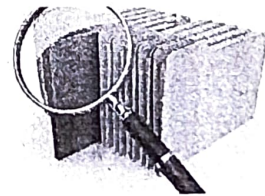

Records of Evidence

Documentation is important for practicing CQI and for accreditation purpose

☐ Curriculum Design Evidence

- Articulation of COs in core program courses
- Mapping of COs into POs
- Mapping of POs into PEOs
- Alignment of PEOs with mission statement
- Involvement of industry and alumni in curriculum design

12

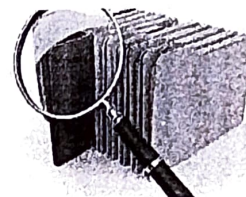

Records of Evidence

Documentation is important for practicing CQI and for accreditation purpose

☐ Course File Evidence

- Practice of appropriate pedagogical methods
- Assessment of CO attainment in core program courses using appropriate assessment tools
- Assessment of PO attainment from CO assessment
- Completion of culminating Capstone/Final Year Design project

13

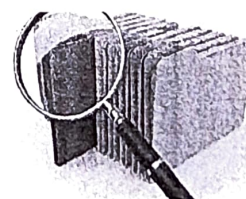

Records of Evidence

Documentation is important for practicing CQI and for accreditation purpose

☐ CQI Evidence

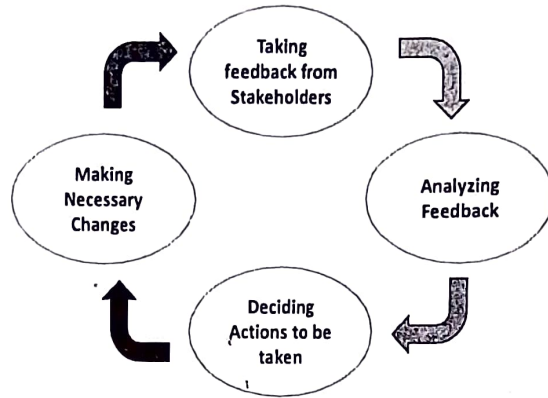

- Use of data and feedback to improve processes, policies and facilities

14

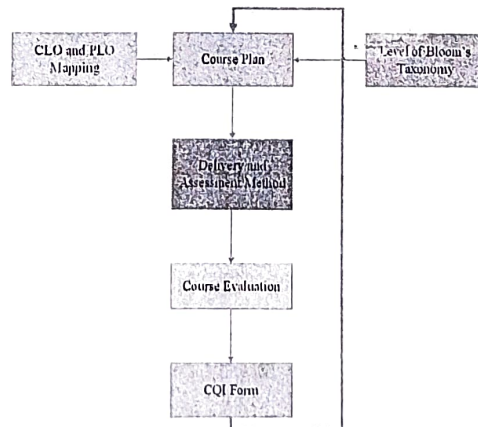

Establish CQI Cycle: Summarize

- ❑ Fixing a period after which actions will be taken for improvement
- ❑ For CO, PO, PEO different duration is possible

15

Example: CQI at Course Level

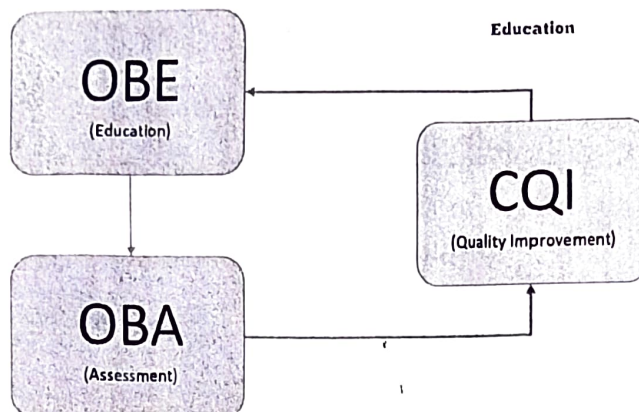

<https://web.uettaxila.edu.pk/MED/OBE-CQIPProcess.asp>

16

CQI Process: The Link

Education

<https://web.uettaxila.edu.pk/MED/OBE-CQIPProcess.asp>

17

CQI Exercise

Current
State

People
Process
Technology

Future State

- Improved Understanding
- Improved Practice
- Improved Implementation
- Improved Attainment

- Evaluate your Current State
- Identify the bottlenecks/challenges
- Propose how to fulfill the gaps to close CQI loop

15/11/2025

18

Thank you for your
Attention !
